

57th Annual Pacific Northwest Animal Nutrition Conference

PROCEEDINGS

and
Novus Preconference

January 15-16, 2024
Grove Hotel
Boise, Idaho

– Organized By –

Washington State University, University of Idaho, University of Alberta,
Oregon State University, and Montana State University

– Committee –

Anne Laarman, University of Alberta

Don Llewellyn, Washington State University

Fred Muller, Ag Health Laboratories

Cory Parsons, CHS Payback Nutrition

Juliana Ranches, Oregon State University

Pedram Rezamand, University of Idaho

Jim Sullivan, Chr. Hansen

Mary Lou Swift, Trouw Nutrition

Megan Van Emon, Montana State University

Tess White, Alltech

– Administration –

Brittany Morstatter – FASS

– Sponsors –

PRECONFERENCE SPONSOR

Novus

COFFEE BREAK SPONSORS

Alltech, Soy Best

GOLD SPONSORS

Adisseo, Arm & Hammer Animal & Food Production, Balchem, Central Life Sciences,
Chr Hansen, Elanco, Global Animal Products, Kemin Animal Nutrition & Health – NA,
Lallemand Animal Nutrition, Papillon Agricultural Company, RD LifeSciences, LLC,
Simplot Western Stockmen's, University of ID - CAFE

SILVER SPONSORS

Ag Health Laboratories, Huvepharma, Jefe, Performix, RP Nutrients, SoyPLUS/SoyChlor

BRONZE SPONSORS

United Animal Health, Zinpro

STUDENT COMPETITION SPONSORS

CHS, Cumberland Valley Analytical Services, Origination O2D, Inc., Virtus Nutrition

SPEAKER SPONSORS

Natural Biologics

57th Annual Pacific Northwest Animal Nutrition Conference PROCEEDINGS

Table of Contents

NOVUS PRECONFERENCE

Intelligent Nutrition | Conserving Resources While Maximizing Production Efficiency

Hedging on feed products

– Sara Dorland, Ceres Dairy Risk Management

Minimizing shrink at feed centers for greater profitability

– Michaela Braun, NOVUS

Increasing milk production and feed efficiency

– Gerald Poppy, DVM Dairy Business Consulting

Maximizing the value of the mineral in your feed program

– Heather Tucker, NOVUS

The ration we create, the ration we make, and the ration the cows eat

– Jim Spain, University of Missouri–Columbia

MAIN CONFERENCE

Building trust with consumers and society

– Kim McConnell, Canadian Centre for Food Integrity

The central role of immune signaling in transition cow productivity and health

– Barry Bradford, Michigan State University | Sponsored by Natural Biologics

Managing health and stress in young calves

– Anne Laarman, University of Alberta

Endophyte toxicoses in beef cattle

– Jennifer Durringer, Oregon State University

Regenerative practices in beef production

– Hugh Aljoe, Noble Research Institute

Economics of natural vs. cross-ventilated barns

– Courtney Halbach, University of Wisconsin–Madison

Cow comfort during the transition period

– Juan Piñeiro, Texas A&M University

Developing replacement heifers for the long run

– Twig Marston, Hubbard Feeds

Mycotoxin: A critical component of any feed quality program

– Duarte Díaz, University of Arizona

The importance of the aerobic stability of silages

– Limin Kung, Jr., University of Delaware

Improvements in balancing dairy cattle diets for energy

– Paul Kononoff, University of Nebraska–Lincoln

Developing safe and effective enteric methane mitigation solutions for dairy cattle: Gaps in knowledge we cannot ignore

– Joseph McFadden, Cornell University

GRADUATE STUDENT POSTER ABSTRACTS

A burning issue: Effects of in-utero wildfire PM_{2.5} exposure on dairy heifers

G. Ponce, A. Pace, M. Rovai, P. Villamediana, P. Rezamand, and A. L. Skibiel*

Characterization of greenhouse gases, ammonia emissions, and nutrient dynamics in a vermifiltration system for liquid dairy manure management

J. L. Monaghan, J. Michal, B. T. Jobson, P. O'Keeffe, C. L. de Castro Nunes, and K. A. Johnson*

Effects of calf starter, weaning, and butyrate supplementation on hindgut development in Holstein calves

S. G. Sayles, A. E. Mark, R. L. Hiltz, D. E. McCurdy, S. Moreland, K. Klanderman, and A. H. Laarman*

Effects of feeding whole milk enriched with transition milk on performance and health of young Holstein calves

I. F. Carrari, M. H. Safaee, S. Kargar, M. Kanani, L. V. Kladt, A. Pazoki, M. I. Marcondes*

Effects of plans of nutrition and breed on the reproductive development of dairy kids

L. V. Kladt, N. Noroozi, P. Dornelas, J. S. Pinheiro, M. I. Marcondes*

Effects of protected and unprotected butyrate supplementation on growth performance and fermentation profile in dairy calves

D. R. Martinez Mayorga, K. R. Johnston, and A. H. Laarman*

Effects of ruminal volatile fatty acids and pH on performance and physiological hindgut fermentation parameters of pre-weaned dairy calves

M. H. P. M. Narciso, A. R. Wolfe, R. R. E. Uwiera, and A. H. Laarman*

Effect of SCFA concentration and pH on health and hematology in pre-weaned Holstein dairy calves

A. Wolfe, M. H. Paez Martins Narciso, R. R. E. Uwiera, A. H. Laarman*

Evaluation of blood parameters and activity budget associated with environmental stress in grazing beef heifers with divergent residual feed intake

S. Lasso-Ramirez, M. Londono-Mendez, C. Fitzsimmons, G. Plastow, E. Bork, J. Basarab, and G. M. Silva*

Impact of saliva nitrogen composition on ruminal parameters in a Rusitec® apparatus using a high-performance dairy diet

Í.R.R. Castro, L.N.C. Silva, I.F. Carrari, G.B.C. Leite, A. Zaragoza, V.A. Achziger, M.I. Marcondes*

Impacts of individual animal intake via low moisture mineral lick tubs on blood plasma total fatty acid concentrations

S. E. Stratton, I. N. Castro, J. E. Williams, and J. B. Hall*

Quantification of cannabinoids residues in ruminants fed spent hemp biomass: Assessing consumers exposure and food safety

*A. Irawan, D. G. Nosal, R. N. Muchiri, N. B. Parker, R. B van Breemen, S. Ates, M. Bionaz**
